

VIVOTEK PT7135 (Wired) / PT7137 (WLAN) with 3GPP compatibility offers a cost-effective solution for mobile remote monitoring as well as indoor surveillance. It enables users not only to receive the optimized, synchronized video and audio by the standard web browser or application software, but also 3G cellular phones or any RTSP(Real Time Streaming Protocol) compatible media device anytime, anywhere. Users can directly employ the built-in RTSP-compatible multimedia software on 3G cellular phones to view the streaming video from the camera site without extra works on downloading and installing additional software.

PT7135/PT7137 delivers excellent image quality up to 30fps in VGA resolution and offers superior low light performance in the dark. With efficient MPEG-4 compression, a variety of applications where available bandwidth is restricted but higher frame rates are required can be implemented and developed with ease. The wide pan/tilt movement, controlled by the application, enables you to locate any position in the viewable area within seconds. VIVOTEK PT7135/PT7137 allows users to easily build up a surveillance system for their exclusive, versatile applications.
